EXAMINER

MISIASZEK, MICHAEL

ART UNIT

PAPER NUMBER

3625

DATE MAILED: 06/28/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/666,796	<b>Applicant(s)</b> CHEN ET AL.	
	<b>Examiner</b> Michael Misiaszek	<b>Art Unit</b> 3625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 18 September 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**1. Claims 1, 2, 4-7, 9, 10-14, 15, 16, 18-20, 21, 22, and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikurak (US 6671818 B1) in view of Fraenkel et al. (US 20030065986 A1, hereinafter Fraenkel).**

#### Regarding Claims 1, 15, 21

Mikurak discloses a method and system for a utility computing environment comprising:

- setting service level thresholds for the utility computing environment, wherein the service level thresholds are based on a service level agreement with a customer (at least column 44, lines 62-67 and column 45, lines 1-8: thresholds set with SLA)
- identifying at least one discrepancy between the promised service level and the current service level (at least column 44, lines 62-67 and column 45, lines 1-8: performance goals tracked, notifications generated when not met)
- providing a rebate to the customer for the at least one discrepancy (at least column 47, lines 9-19: rebates given for SLA breaches)

Art Unit: 3625

Mikurak does not disclose:

- displaying a view of a current service level for the customer
- presenting a view of a promised service level based on service level agreement parameters

Fraenkel teaches that it is known to include presenting and displaying a view of service level (at least figure 14) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Mikurak, with the presenting and displaying a service level, as taught by Fraenkel, since such a modification would have provided a means for monitoring resource performance and determine performance problems (at least paragraph [0011] of Fraenkel).

Art Unit: 3625

Regarding Claims 2, 4-7, 9, 16, 22

Mikurak discloses:

- the service level agreement parameters include at least one of a duration, a transaction, a configuration, and a threshold (at least column 44, lines 62-67 and column 45, lines 1-8: thresholds set with SLA)
- the service level thresholds are used to generate a warning prior to the occurrence of the at least one discrepancy (at least column 73, lines 54-67: alarms from proactive threshold manager)
- the discrepancy is identified by at least one of breaching the service level agreement, exceeding the service level agreement parameters, and completing a service request prior to a promised service level completion time (at least column 44, lines 62-67 and column 45, lines 1-8: performance goals tracked, notifications generated when not met, i.e., exceeding thresholds)
- the service level thresholds are set for at least one of a customer, a service provider, and a utility computing host (at least column 44, lines 62-67 and column 45, lines 1-8: thresholds set with SLA for customer)
- alerting the at least one of the customer, the service provider, and the utility computing host of the at least one discrepancy and a root cause for the at least one discrepancy (at least column 74, lines 1-18: notification events generated based on hardware failures/problems)

Art Unit: 3625

Mikurak does not disclose:

- the view of a current service level is at least one of a real-time view and a historical view

Fraenkel teaches that it is known to include a real-time or historical view of service level (at least figure 14: views of service level) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Mikurak, with the real-time or historical view of service level, as taught by Fraenkel, since such a modification would have provided a means for monitoring resource performance and determine performance problems (at least paragraph [0011] of Fraenkel).

Art Unit: 3625

Regarding Claims 10, 18, 24

Mikurak discloses:

- presenting a promised service level based on a service level agreement (at least column 46, lines 1-9: customer reports generated of SLA parameters)

Mikurak does not disclose:

- displaying at least one of an infrastructure view and an application view of a current service level for a customer, wherein the infrastructure view contains information technology hardware and software components, wherein the application view contains software applications residing on utility computing resources, and wherein the infrastructure view and the application view are linked
- retrieving additional details of the at least one of the infrastructure view and the application view by clicking on a component of the at least one of the infrastructure view and the application view
- switching between the infrastructure view and the application view

Fraenkel teaches that it is known to include an infrastructure view containing information technology hardware and software components (at least figure 29: server and memory performance and software performance displayed) and an application view containing software applications (at least figure 22: software (transaction performance displayed), linking the views (at least figures 22, 29: pages linked by menu on left side), retrieving additional details with a mouse click (at least figures 22, 29: date menus at top can be clicked to retrieve additional details), and switching between views (at least figures 22, 29: views switched between via menu on left side) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system and method, as taught by Mikurak, with the infrastructure view and application view, and their functionalities, as taught by Fraenkel, since such a modification would have provided means for monitoring resource performance and determine performance problems (at least paragraph [0011] of Fraenkel).

Art Unit: 3625

Regarding Claims 11-14, 19, 20, 25, 26

Mikurak discloses:

- alerting at least one of a customer, a service provider, and a utility computing host of a discrepancy between the current service level and the promised service level (at least column 44, lines 62-67 and column 45, lines 1-8: performance goals tracked, notifications generated when not met)
- providing a rebate to a customer when at least one discrepancy between the current service level and the promised service level occurs (at least column 47, lines 9-19: rebates given for SLA breaches)
- the at least one discrepancy is based on at least one of exceeding a service level agreement parameter, breaching a service level agreement, and completing a service request prior to a promised service level completion time (at least column 44, lines 62-67 and column 45, lines 1-8: performance goals tracked, notifications generated when not met, i.e., exceeding thresholds)

Mikurak does not disclose:

- a view of the current service level includes at least one of a warning, an alert, a breach, a duration, a transaction, a configuration, a threshold, a rebate, a utility computing resource, a consumed computer resource, and a consumed human resource

Art Unit: 3625

Fraenkel teaches that it is known for the view of a service level to include a transaction (at least figure 14: transactions displayed) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Mikurak, with the inclusion of a transaction in a service level view, since such a modification would have provided (motivation).

Art Unit: 3625

**2. Claims 3, 8, 17, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikurak in view of Fraenkel, as applied to claims 1, 15, and 21 above, and further in view of Steele et al. (US 20040174823 A1, hereinafter Steele).**

The combination of Mikurak and Fraenkel discloses the claimed invention except for:

- modifying the service level thresholds using a graphical user interface
- providing an option to customize the view of the current service level and the view of the promised service level

Steele teaches that it is known to include modifying service level thresholds using a graphical user interface (at least paragraph [0031]: user enters SLA parameters in window) and providing an option to customize a view associating with a service level (at least claim 18: SLA window can be customized) in a similar environment. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method and system, as taught by Mikurak and Fraenkel, with the modifying service level thresholds and customizing views, as taught by Steele, since such a modification would have provided a means to create service level agreements efficiently without requiring a network administrator to approve each customer's agreement (at least paragraph [0004] of Steele).

Art Unit: 3625

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Misiaszek whose telephone number is (571) 272-6961. The examiner can normally be reached on 8:00 AM - 4:30 PM, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey A. Smith can be reached on (571) 272-6763. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
